### REFERENCE LIST FOR OZGEN OZONATION EQUIPMENT

Watertec Engineering Pty Ltd has a strong technical background in the ozone applications, chemical engineering field and Membrane specialising in the design and supply of water treatment equipment to the water and wastewater industry. Watertec Engineering Pty Ltd is involved in specialised technology for the treatment and disinfection of potable water, sewage, cooling water and commercial recreational systems.

Watertec Engineering Pty Ltd has installed numerous ozone treatment systems, the earlier ones being units manufactured in Europe. Due to the need for a locally produced and a higher quality product we now manufacture a complete range of corona discharge ozone generators, in Australia. The **Ozgen™** ozonator range offers many features and quality standards that are not found in other ozonators.

The following list details some of the more recent projects where **Ozgen** ozonators have been installed.
